

Common Rail High Pressure Pump CP

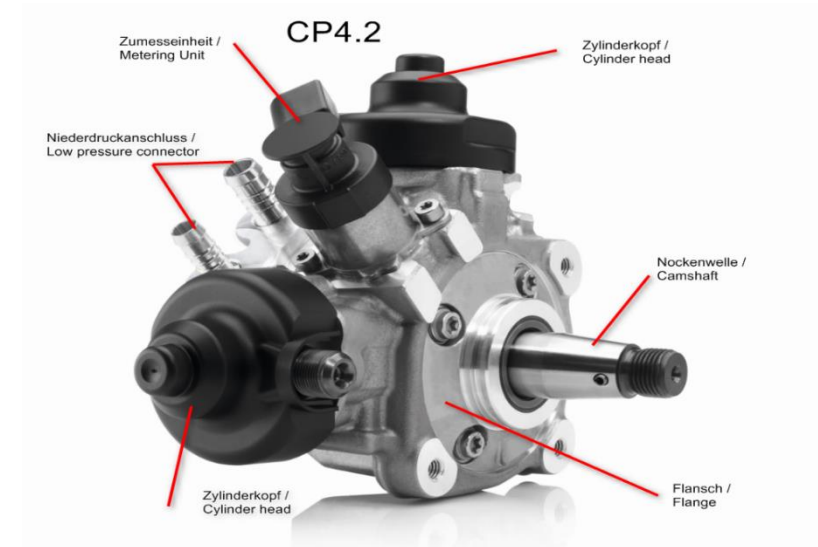

Criteria:

Identification

Completeness

Mechanical damage

Corrosion

Common Rail High Pressure Pump CP

Criteria:

Identification

Part number must be legible

Acceptable

Common Rail High Pressure Pump CP

Criteria:

Completeness

Aggregate dismantled is not acceptable
missing parts (suction valve, sealing cap) is acceptable

Not acceptable

Acceptable

Common Rail High Pressure Pump CP

Criteria:

Completeness

Metering Unit (ZME) missing is acceptable

Acceptable

Acceptable

Common Rail High Pressure Pump CP

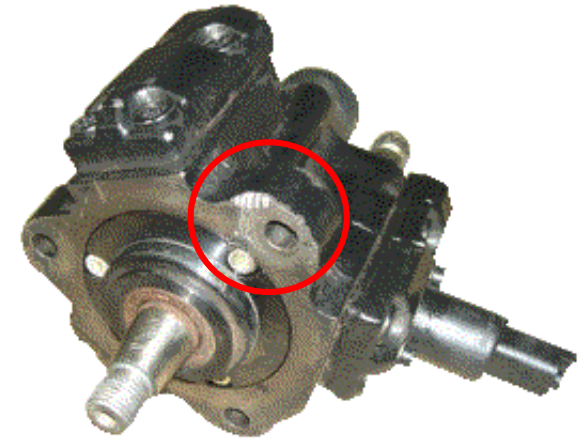

Criteria:

Mechanical damage

Damage on housing or damage on drive flange

Not acceptable

Not acceptable

Common Rail High Pressure Pump CP

Criteria:

Corrosion

Corrosion on pump housing is acceptable;
heavy corrosion on flange is not acceptable

Acceptable

Not acceptable
